UPCOMING PROGRAM DATE

Sep. 15, 2017 - Jan. 20, 2018

Jan. 18 - May 5, 2018

18 days over 4 months

# Masters Certificate in Project Management

Consolidate and certify your PM skills  
to add value to all your projects.

## Program Leadership Insights

Project Management skills are a new core competency in organizations at all levels.

Understanding how all the phases of the project lifecycle fit together benefits projects of any size.

Structured techniques for project management add the maximum amount of value during project execution.

# Why consolidate and certify your PM skills?

Organizations now understand that success is built on the success of their projects.

Organizations of all types and sizes today understand that **everything is a project** – from implementing a new business system, to getting the boss to Europe and back over 10 days, to organizing a meeting. That means everyone in every functional area – from executive assistants to vice presidents – **is a potential project manager**. Top organizations foster success by cultivating strong Project Resources and supplying their people with the tools and formal training they need to get the job done right the first time.

## Why formal training in project management?

Projects can have a lot of moving parts. Successfully managing them requires more than just using PM software to make Gantt charts. **Without formal training, those who execute projects are essentially winging it, learning on the job through trial and error.** They cannot be sure that what they're doing is right or wrong, or missing something, or that the solution they implement is the best possible course of action. To excel at the job, a Project Manager requires concise, comprehensive formal training in the best practices, current thinking, and tools of the trade.

## Project managers are now expected to add value.

The PM field is becoming very competitive. Top PMs know that in order to deliver on time, on spec, and on budget, they **need to know all facets of the field and apply their knowledge nimbly and accurately**. That means being able to communicate with the team, manage stakeholders, procure and plan, ensure quality, minimize risk, and so much more.

Truly competitive companies want Project Managers who can connect the work to the overall strategy, and **add value by bringing a complete skill set to bear**. A well-trained project manager trumps the person who's winging it every time.

# Masters Certificate in Project Management

The Masters Certificate in Project Management has been designed from the ground up to build excellent project managers – skillful, strategic leaders who can consistently guide projects to success.

With a proven curriculum based on *A Guide to the Project Management Body of Knowledge (PMBOK®)* developed by the Project Management Institute (PMI®), the program can return many times the value of the financial investment for years to come through successfully executed projects.

Participants will benefit from:

- The ability to look at a projects in a whole new light and manage them systematically and strategically.
- A huge kit of powerful new tools, documents and templates which can be used as is or modified to suit.
- Getting prepared to write the PMP® designation exam through mastery of the material and the required contact hours (please refer to PMI.org for complete application requirements).
- Hands on practice applying the material through a simulated project woven throughout the program – our ‘secret sauce’ for accelerated, intensified learning.

*“The approach to the program was great. Two full days to learn, discuss, and immerse yourself into each topic. I feel the principles presented are now ingrained. I will recommend the course without a doubt.”*

G. Doecker, International Road Dynamics Inc., Saskatoon

*“The teaching methods of instructors were the best... very thorough and well presented for ease of understanding. Nothing but positive things about how the program was organized and presented.”*

Michael Parker, Jancon Construction Ltd, Toronto

## ■ Overview of Course Modules

The program runs in convenient two or three day modules every second week, including one weekend day.

MODULE 1: September 15, 2017 | January 18, 2018

### Program Introduction
