Learn to negotiate successful outcomes in any situation.

We all negotiate countless times a day to resolve conflicts, client problems or differences of opinion. But few of us have taken the time to think about what we are doing when we negotiate and how we might improve. In three highly-interactive days of learning, participants will analyze their own negotiating style, develop a practical understanding of effective negotiating behaviours, and improve their ability to plan and conduct successful day-to-day negotiations in every situation. New negotiating skills will be reinforced using hands-on exercises, case discussions and simulations from a variety of functional areas such as sales, purchasing, and union-management relations.
